

Addendum 5

Northeast Texas Regional Mobility Authority

Roadside System Implementation and Maintenance

Contract

NET RMA does not currently have the finalized contract to provide potential proposers for review. We believe the agreement will reference essential performance areas within the RFP, particularly on Key Performance Indicators and damages.

NET RMA may not share the contract until selection of the best value proposer, approved by the NET RMA Board. NET RMA will work openly with the awardee and remain fair in addressing aspects of the contract that the awardee may deem difficult with which to comply during the negotiation phase. Our goal is a mutually rewarding, long-term partnership.
